

SUCCESSFUL APPLICATIONS FIELD TRIALS

Beans

The following products were applied as foliar treatments on days 21, 36, 50 and 64 after sowing to plots replicated three times:

1. Control (equivalent volume of water)
2. Kelpgrow diluted 1:250 (4 Lt./Ha)
3. Kelpgrow diluted 1:500 (2 Lt./Ha)
4. Other seaweed product diluted 1:500 (2Lt./Ha)

Results show a crop yield increase of 23% for Kelpgrow (1:250) and 26% for Kelpgrow (1:500), while the other seaweed based product performed a crop yield increase of 16%.
